Blueprint Learning Management System

The LMS that adapts with your business

Futureproof your learning investment with a configurable, SCORM & xAPI compatible learning management system that provides endless possibilities to support your learning and training.

The LMS for future thinkers

Technology shifts mean that new ways of learning are always being experimented with, but that doesn't always carry over to the LMS that you're using.

How many times have you wanted a new feature or tool added only to be told that it would take years?

Or how about being able to measure and track your learning outcomes with xAPI to connect their dollar value to the business?

Perhaps you've wanted to try interactive new learning tools only to find out they were a costly addition?

Now imagine that there was an LMS that could do all those things without the hidden fees?

Blueprint can. Modern, SCORM & xAPI compatible, and with loads of free inclusions.

Your LMS, your choice

The experts behind Blueprint have created an extremely configurable LMS that puts the power into your hands when it comes to training and learning.

Blueprint lets you...

- ✔ **Protect your investment with a modern and upgradable system** that's always got the latest features and tools
- ✔ **Request new tools and configurations** that you won't have to wait years for
- ✔ **Have tools like forums, discussion boards, live chat, wikis, blogs and virtual classrooms included as standard** with no hidden costs to accessing them
- ✔ **Gain insights into how learning is increasing productivity and impacting your bottom line** by connecting xAPI to training and tools
- ✔ **Get unlimited support from an ultra-responsive team** that provides ongoing technical training

Blueprint spoils you for choice

Modern day learning is easy and achievable with Blueprint's responsive and feature-rich design.

Advanced course authoring tool

Enables bespoke experiences across devices, easily adding screens akin to editing a Word document.

SCORM and xAPI compatible*

To help you prove the ROI of your learning investments and identify measures that will deliver the greatest return for your training dollar.

Proactive AI engine

That identifies which learners are likely to fall behind for early intervention, and provides individualised course recommendations.

* We have full dedicated xAPI reporting so that you can report xAPI data whether or not it's the same as your SCORM data.

Most other LMSes only report xAPI information that happens to match your SCORM data – offering you no value beyond what SCORM gave you.

Rich automation

Simplifies administration, whether scheduling reports weekly or automating user creation upon hiring, induction enrolment, role-based learning plans, and reminders for certification renewals.

Cloud-based & mobile-ready

So that your learners can learn on any device and from anywhere across the world.

Custom reports

Let you report what you want, in the format you want it, when you want it. Just drag what you need into your report and Blueprint does the rest.

Learning made for YOU

Learning plans

Individualised learning plans that are automatically generated by the system

- ✓ Based on current & required skills
- ✓ Matching their competency matrix
- ✓ Includes certificates & endorsements

Blended learning

Blueprint supports holistic and blended learning strategies to create a clever and integrated experience

- ✓ Supports face-to-face (ILT) learning
- ✓ Calendar integration, class scheduling, & attendance marking
- ✓ Built-in observational assessments & task-based learning

Extensible

The Blueprint Plugin Library provides a wealth of extensions, many free of charge

- ✓ A for-purpose catalogue of hundreds of thousands of courses
- ✓ Automatic importers & exporters as well as an API
- ✓ So smart, the API even generates the install code

Appraisals & talent

Blueprint's staff appraisal tool bridges professional development goals with performance goals in a single tool

Flexible & cutting edge in approach ✓

Use standard forms & workflow, or design your own ✓

Blueprint takes care of all aspects of your appraisal management ✓

On-the-job assessments

Blueprint features a unique tool for assessing knowledge at the coalface

Real-time & consistent observational assessments ✓

Standardised tasks & activities recorded ✓

Determine clever strategies for bridging knowledge gaps ✓

Single sign-on

Plugs into your LAN to allow users to navigate directly into the LMS without separate logins

Synchronises into your HRMS (payroll) system ✓

Sets new users automatically ✓

Retires them when they leave ✓

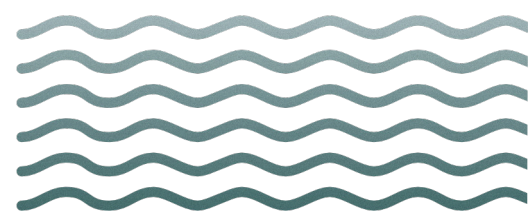

Which Blueprint is right for you?

The trusted experts in learning

Global Vision was founded in Melbourne with a mission: we want your staff to feel as safe, valued and comfortable in their work as we feel in ours.

Our team is made up of digital learning experts and technological innovators that bring the latest in learning and development to Australian shores.

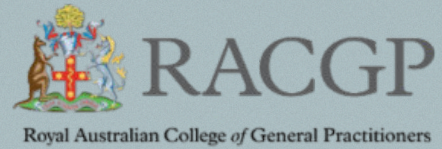

With a combined 155+ years of experience, we've worked with some of the world's largest organisations globally (not to mention multiple government departments in Australia & New Zealand) to create and deliver award-winning results.

We listen, research, recommend and partner with you to deliver a solution that will fit your needs now, and as you grow and scale in the future.

How RACGP became the undisputed leader of GP learning & training

Problem

25 years ago, the Royal College of General Practitioners (RACGP) engaged Global Vision to create new courses for its members.

In the midst of the project, Global Vision identified a clear risk factor to the RACGP: the organisation was maintaining the CPD data of 17,000 GPs on Excel spreadsheets. One wrong click and an entire dataset could be lost forever and impact the careers of hundreds of people.

Solution

Going above and beyond the original brief, Global Vision partnered with the US-based supplier of a new software that promised to completely transform RACGP's learning experience: the learning management system.

The RACGP became the first Australian organisation to leverage the power of LMS which transformed how it delivered training to its members and tracked CPD completions.

Outcome

In just under 12 months, RACGP became the undisputed leader in national training for GPs – and this is still the case today.

Global Vision realised that the RACGP couldn't be the only institution that was having trouble delivering training and managing learning data, and wrote a business plan to operate the US LMS in Australia.

This project has enabled Global Vision to not only become a pioneer in the field of learning & development, but it completely transformed the L&D landscape in Australia forever.

What our customers say

“I also wanted to commend you and the team on the delivery of a great product on very tight timelines.

It was a pleasure to work with a team that was so receptive to our feedback and keen to develop a high-quality product.

Tyron Paspas
Victorian Department of Education

“GVM staff were professional & provided me with outstanding levels of support. They met all deadlines & their cost estimations were accurate & concise.

Christopher Ruff
BHP

“Over a 25-year career as a medical educator I have worked with many contractors from many fields.

Never have I worked with a company as talented, proactive, honest and creative as Global Vision Media. Over the years we've worked together I have come to trust you guys totally and I recommend you to everyone.
